<b>MKIF profile</b>	MKIF, managed by MKAM, has the portfolio of infrastructure assets in Korea that have been, or are being, constructed under the Act on Public-Private Partnerships in Infrastructure (PPI Act).  MKIF was established in December 2002 with a mandate to invest in entities that construct or operate infrastructure businesses such as toll roads, bridges, tunnels, port and city gas in Korea. MKIF invests in these infrastructure businesses through equity and debt. MKIF is focused on generating profits from its investments and distributing these profits to its shareholders.

---

\* MKAM assessed MKIF risk level, the investment grade, at 4 (moderate risk) in consideration of MKIF's target asset and associated risk. However, this is a subjective rating by MKAM and should not be recognized as an official rating by any external rating agencies. Also, MKIF is not a complex product under the Act.

^ See Section 4. Registered Asset Managers and Appendix I. MKIF Board of Directors for more information.

## 1.2 Asset Details

Under the Act, MKIF is required to report the net asset value per share (NAV per share) of its portfolio.

The total net asset value of MKIF's portfolio is calculated by subtracting total liabilities from total assets of MKIF. MKIF's assets include its equity and debt investments in concession companies, cash and deposits and other investment securities. The net asset value per share of MKIF is calculated by dividing total net asset value by the number of outstanding shares.

The Collective Investment Property Appraisal Committee of MKAM has chosen to adopt the acquisition cost as its assessment of fair value for the unlisted equity investments under the Act and accounting principles generally accepted in Korea (K-GAAP). In addition, the debt investments are measured at amortised cost under the Act and K-GAAP.

The calculation of the NAV per share of MKIF is set out in the table below. For the purposes of this calculation, asset and liability information is based on the balance sheet of MKIF, which is attached as Appendix II.

(Unit: KRW, share)

Type	Q1 2024	Q2 2024	% Change
<b>Total Assets (A)</b>	3,396,509,985,933	3,393,858,007,101	(0.08)%
<b>Total Liabilities (B)</b>	488,454,933,262	430,437,781,876	(11.88)%
<b>Net Asset Value (C=A-B)</b>	2,908,055,052,671	2,963,420,225,225	1.90%
<b>Shares (D)</b>	435,781,355	435,781,355	-
<b>NAV per share (E=C/D) *</b>	6,673.20	6,800.25	1.90%

+ NAV per share of MKIF is calculated by dividing total net asset value by the number of outstanding shares. However, as MKIF is listed on the Korea Exchange, its shares are traded at share price.

## 2. Management Performance and Term Performance

### 2.1 Overview

Established on 12 December 2002, MKIF is a leading private sector infrastructure investor in Korea under the PPI Act and governed by the Act. MKIF is mandated to invest in concession companies that construct or operate infrastructure assets through equity and debt. MKIF is focused on generating profits from its investments and distributing these profits to its shareholders. As of current quarter-end, MKIF has committed to invest in 14 toll roads, 1 rail, 1 port and 3 city gas business operators with a total investment commitment of KRW 2,685.9 billion.

### 2.2 Management plan

MKIF focuses on investing in loans to, and unlisted equity of project companies that operate infrastructure assets pursuant to the PPI Act.

Accordingly, main investment targets of MKIF are project companies that operate toll road, tunnel, bridge, port, city gas business and other infrastructure assets listed under Article 2 Sub-paragraph 1 of the PPI Act.

MKIF aims to grow its revenue and provide stable distributions to shareholders by continuously making investment in project companies that operate infrastructure assets and actively managing its portfolio companies,

### 2.3 Management performance

The table below sets out the historical NAV (including the distribution paid) for MKIF. As explained above and given that the majority of MKIF's assets are held at their acquisition cost, the net asset value is not representative of changes in the value of the MKIF portfolio.

## 9. Environmental, Social and Governance (ESG)

### Our vision

MKAM, as an affiliate of the Macquarie Group (Macquarie) and in a capacity as a manager and corporate director of MKIF, has adopted ESG framework that Macquarie Asset Management (MAM) applies to its fund management activities to the extent relevant and possible. MAM aims to improve the sustainability performance of its portfolio companies by addressing material ESG issues and opportunities to enhance long-term value for our investors. MAM addresses a broad range of ESG risks and opportunities throughout the entire investment lifecycle from screening and due diligence through to ongoing asset management and exit. MAM also regularly collect a range of ESG data from portfolio companies, allowing us to track and support improvement of their ESG performance. ESG information is communicated to shareholders at least annually in fund reports and fund presentations. MKAM is committed to continuously improving our ESG performance and look forward to continuing to share our progress with investors.

### Macquarie Asset Management (MAM) net zero commitment

In December 2020, we announced a commitment to invest and manage our portfolio in line with global net zero emissions by 2040.

The implementation of our net zero commitment is inherently complex, and we are in the early stages of making progress on our goals. There have been significant developments in this area over the past three years, including new methodologies that were not available in 2020, along with a deeper understanding of the various pathways to net zero and their associated challenges across the sectors and asset classes in which we invest.

In light of these developments, we confirm our commitment to invest and manage our portfolio in line with global net zero scope 1 and 2 greenhouse gas (GHG) emissions by 2040, where we have control or significant influence<sup>+</sup>. Where we do not have control or significant influence, such as in our managed portfolio of public securities, we will continue to support the goals of the Paris Agreement<sup>^</sup> in a manner consistent with our client-guided fiduciary and regulatory responsibilities.

Over the coming months, we will provide more detail on how we are implementing our net zero strategy across our various asset classes. We will also disclose further information on our interim targets, the assumptions we have made and the methodologies we are using\*.

We look forward to working with our investors, portfolio companies, regulators and other stakeholders to achieve these transformational objectives for the benefit of all. We remain grateful for these partnerships and we welcome continued engagement as we seek to play our part in building a more sustainable future for everyone.

<sup>+</sup> MAM generally only has influence over scope 1 and 2 emissions. However, to the extent possible, in line with the Net Zero Asset Managers initiative guidance, MAM intends to support assets where it has control or significant influence to reduce their scope 3 emissions.

<sup>^</sup> The Paris Agreement's central aim is to strengthen the global response to the threat of climate change by maintaining a global temperature rise this century well below 2°C above pre-industrial levels and to pursue efforts to limit the temperature increase even further to 1.5°C. The Intergovernmental Panel on Climate Change concluded the need for net zero emissions by 2050 to remain consistent with 1.5°C.
